

Seeking a motivated *high school junior or senior* to participate in a:

High Tech Summer Project

Our firm, Deep Phase Labs, LLC (DPL) is a Boston-based collective of engineers and enthusiasts dedicated to cultivating fledgling technologies.

We are assembling a small team of smart and creative teenagers to participate in an out-of-the box **Summer Internship**.

The project will involve learning to program a hardware device (such as the Kinect, Oculus Rift, or NeuroSky Mindset, etc). The goal is to develop a simple app that does something never-done-before!

If interested, please contact:

Deep Phase Labs, LLC

High Tech Summer Project

Details:

- Unpaid internship supervised by a PhD optical scientist
- Team Project (4– 5 interns)
- Time commitment:
 - 12 - 15 hours per week
 - 4 - 5 hours per day (Mon, Wed, Thurs)
 - Total number of weeks in Summer (5 – 8)
 - Week-to-week is flexible to accommodate vacation plans
- Primary Gathering Place:
 - District Hall in Boston’s “Innovation District”
- Opportunity for a real learning experience
 - Regular access to a computer-science tutor
 - Emphasis on collaboration
 - Develop an app for a recently marketed or prototype device
- Not your typical internship
 - Embraces the idea that innovation occurs outside of the office
 - Requires exceptional independence, maturity, and motivation
 - A successful Summer is *not* guaranteed
 - Value of the experience will be up to the team itself
 - There is zero risk of being turned into a cubicle monkey
